

For Immediate Release

7SAFE BRINGS CASELOGISTIX INTO FULL SERVICE EDISCOVERY MODEL

***New Agreement Expands 7Safe's end-to-end Legal Gateway Presence for
Advanced Litigation Support Solutions and Services***

LONDON, UK, NOVEMBER 25, 2009 Leading eDiscovery services firm 7Safe® has formed an alliance with best-of-breed litigation support solutions provider Anacomp® Inc.

7Safe now provides the hosted version of CaseLogistix®, Anacomp's flagship litigation support review and production platform, as part of its eDisclosure and litigation support services offering. This latest addition gives 7Safe clients the ability to quickly organise, review, analyse and produce digital evidence, resulting in more streamlined and accelerated litigation review.

"We're pleased to offer CaseLogistix as the foundation of our litigation support and document review services," said Alan Phillips, 7Safe's CEO. "We examined several review solutions in the market, but none matched the advanced architecture, easy usability, and Native file processing abilities of CaseLogistix. It has therefore been a straightforward decision to leverage the solution and continue offering our clients the outstanding level of service they have come to expect from us."

Stephen Davis, Managing Director of Anacomp's UK-based CaseLogistix LTD subsidiary commented, "Having worked alongside 7Safe in the eDiscovery market for

some time now, it is a pleasure to be collaborating with this service-centric technology leader. We are excited to be supporting 7Safe's robust litigation processing, review, analysis and production capabilities,"

About 7Safe

7Safe is an established data services provider, specialising in litigation support and computer forensics. From offices in London and Cambridge, the company offers a wide range of related service lines, including eDiscovery, security penetration testing, PCI DSS, computer forensic investigations and Masters-level education.
