7SAFE OFFERS CASELOGISTIX IN THE UK FOR ACCELERATED ELECTRONIC DISCOVERY

Alliance Agreement Expands Anacomp's European Presence for Advanced Litigation Support Solutions and Services

SAN DIEGO, CA AND LONDON, UK, NOVEMBER 26, 2009— Anacomp® Inc., a leading provider of litigation support, eDiscovery and document-centric business process services and solutions, today announced a new strategic alliance agreement with 7Safe, a leading UK full-service eDiscovery firm. Under the terms of the agreement, 7Safe provide the hosted version of CaseLogistix®, Anacomp's flagship litigation support platform, as part of its eDisclosure and litigation support services, offering its clients the ability to quickly organize, review, analyze and produce digital evidence, resulting in more streamlined and accelerated litigation review.

"We're pleased to offer CaseLogistix as the foundation of our litigation support and document review services," said Alan Phillips, 7Safe's CEO. "We examined several review solutions in the market, but none matched the advanced architecture, easy usability, and Native file processing abilities of CaseLogistix. It has therefore been a

straightforward decision to leverage the solution and continue offering our clients the outstanding level of service they have come to expect from us.”

As part of the strategic relationship, 7Safe will serve as a preferred provider of data processing and other eDisclosure services in the UK as an *Anacomp Connected Partner Program* certified services provider.

“Having worked alongside 7Safe in the eDiscovery market for some time now, it is a pleasure to be collaborating with this service-centric technology leader. We are excited to be supporting 7Safe’s robust litigation processing, review, analysis and production capabilities,” said Stephen Davis, Managing Director of Anacomp’s UK-based CaseLogistix Ltd subsidiary. “The alliance is furthermore indicative of Anacomp’s desire to collaborate with best-of-breed partners who deliver complete, end-to-end eDisclosure consulting, services and solutions to the marketplace.”

CaseLogistix enables legal teams to quickly collect, organize, review, analyze and produce any amount of electronically stored information (ESI) using an interface similar to that of Microsoft® Outlook®. The system is fully Unicode compliant and is able to recognize all foreign language character sets. In addition, CaseLogistix’s innovative docNative™ Paradigm approach to eDiscovery emphasizes native file review, empowering users to view hundreds of file types, including audio and video, without the need of third party file conversions. Anacomp’s docNative Paradigm also empowers the ability to manage images such as TIFFS, so hybrid format environments of TIFFS, near-native, and native files are seamless to the user.
